Name: _____

get *productive* **with c#**
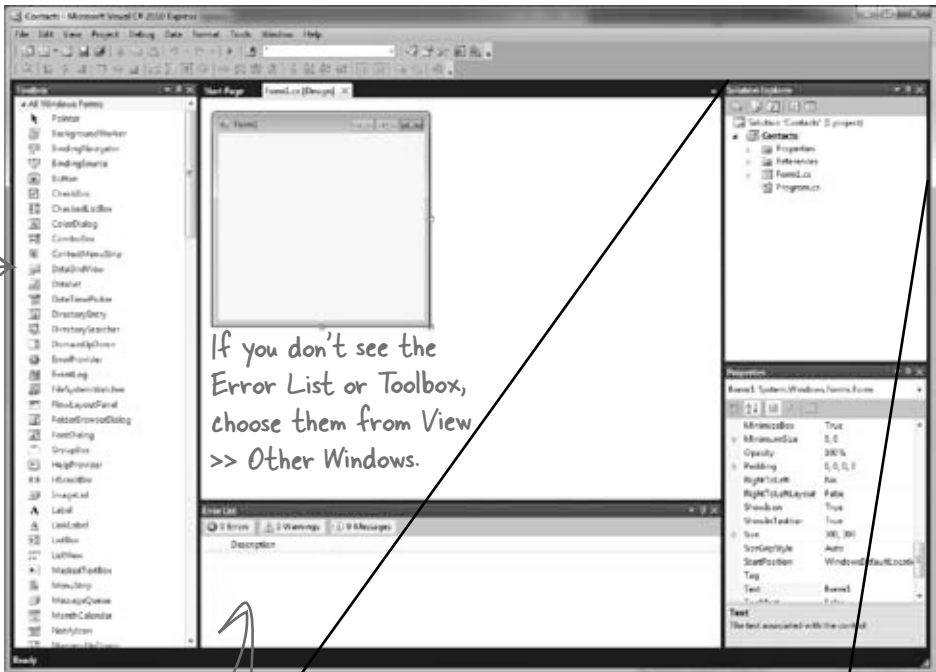

Sharpen your pencil

Below is what your screen probably looks like right now. You should be able to figure out the purpose of most of these windows and files based on what you already know. Make sure you open the Toolbox and Error List windows by **choosing them from the View >> Other Windows menu**. Then in each of the blanks, try and fill in an annotation saying what that part of the IDE does. We've done one to get you started.

This toolbar has buttons that apply to what you're currently doing in the IDE.

If your IDE doesn't look exactly like this picture, you can select "Reset Window Layout" from the Window menu.

We've blown up this window below so you have more room.

If you don't see the Error List or Toolbox, choose them from View >> Other Windows.
